

**The American Association for the Advancement of Science  
and  
Hitachi Ltd.**

are pleased to invite you to the

**First Annual Hitachi Lectureship at AAAS**

Addresses by

**Hideaki Koizumi, Hitachi Ltd.**

Dr. Koizumi is recognized worldwide as an early proponent and major advocate of the new transdisciplinary field of Mind-Brain Science. His research contributions include the development of functional MRI and Optical Topography for the real-time observation of brain functions.

and

**Thomas Woolsey, Washington University School of Medicine**

Dr. Woolsey is a world-renowned neurobiologist best known for his discovery of the cortical barrels in rodents. During his nearly forty years at Washington University School of Medicine, he has won numerous awards for teaching medical students, residents, graduate students, and undergraduates in psychology and life sciences.
