

ABOUT THE AUTHORS

SUSAN E. COZZENS is professor and chair of the School of Public Policy at the Georgia Institute of Technology, and was director of the Office of Policy Support at the National Science Foundation from 1995 through 1997. Her research areas include technological choice and research assessment. She has been active since the 1980s in developing approaches and methods for evaluating government supported research.

IRWIN FELLER is director of the Institute for Policy Research and Evaluation and professor of Economics at The Pennsylvania State University where he has been on the faculty since 1963. He conducts research on the economics of academic research, the university's role in technology-based economic development, and the evaluation of federal and state technology programs.

J. SCOTT HAUGER is program director of the Science and Engineering Policy and Practice Group of the American Association for the Advancement of Science. He has authored numerous articles, policy studies and reports, and has served as principal investigator on a variety of studies in the field of technology and disability, including human subject studies in the area of assistive technologies.

W. HENRY LAMBRIGHT is the director of the Center for Environmental Policy and Administration, and professor of Political Science and Public Administration at the Maxwell School of Citizenship and Public Affairs at Syracuse University. He conducts research on federal decision-making regarding space technology, environmental policy, integration of science with policy, and technology transfer.
