AAAS Forum on Science & Technology Policy

30 April–1 May 2009 • Washington DC
Ronald Reagan Building and
International Trade Center

Find out what's in store for
science and technology.

The annual AAAS Forum on Science and Technology Policy is *the* conference for people interested in public policy issues facing the science, engineering, and higher education communities. Since 1976, it has been the place where insiders go to learn what is happening and what is likely to happen in the coming year on the federal budget and the growing number of policy issues that affect researchers and their institutions. Come to the Forum, learn about the future of S&T policy, and meet the people who will shape it.

Who should attend?

Scientists and engineers, research administrators, industrial R&D managers, policymakers, association officials, federal grant recipients, students, science diplomats, government affairs specialists, public affairs officers, science writers, and others with an interest in the intersection of policy with science and technology.

Advance Registration Fees:

	<i>AAAS Member</i>	<i>Non-member</i>
Regular	\$415	\$465
Non-Profit	\$365	\$415
Student, Postdoc, Retired	\$125	\$155

Deadline for advance registration: 9 April 2009

Included with your registration:

AAAS Report XXXIV: Research and Development, FY 2010, a comprehensive analysis of the R&D proposals in the FY 2010 budget, prepared by AAAS and a group of its affiliated scientific, engineering, and higher education associations.

Information on registration and meal function tickets can be found on the web site listed below.

For full details and registration:

www.aaas.org/forum

Program will include

- ▶ Keynote address by Assistant to the President for Science and Technology and Director, Office of Science and Technology Policy (invited)
- ▶ Overview of the Obama Administration's proposals for research and development in the FY 2010 budget
- ▶ Many other topics, such as:
 - The political and economic outlook for science and technology in 2009, including the congressional context, policies on innovation and competitiveness and economic recovery
 - Energy and international climate policy developments
 - Integrity in science in the new administration
 - Science and the regulatory agencies
 - Toward an evidence-based science policy
 - Scientific literacy and the future of science journalism
- ▶ The William D. Carey Lecture, an invited address by a notable figure in S&T
- ▶ Reception Thursday evening, and meal functions featuring distinguished speakers (luncheons Thursday and Friday; breakfast Friday)
