

# Invention and Impact:

Building Excellence in  
Undergraduate Science, Technology,  
Engineering and Mathematics (STEM) Education

---

*Sponsored by the National Science Foundation (NSF)  
Division of Undergraduate Education (DUE)*

*In Collaboration With the  
Education and Human Resources Programs (EHR)  
American Association for the Advancement of Science (AAAS)*

NSF Grant #DUE 0343734

ADVANCING SCIENCE. SERVING SOCIETY

---

## Publication

Publication of symposia, which have been developed under the aegis of AAAS, requires the written permission of AAAS as well as that of the individual organizers and speakers.

Video and/or audiotaping of any session or parts thereof for commercial purposes are not permitted without prior approval from the speakers, organizers, and AAAS.

AAAS is not responsible for the accuracy of advertising information in this program book. Product information published herein is provided by the participating advertisers and does not constitute endorsement by AAAS.

---

## This is a Proceedings of an April 2004 Conference

Abstracts and synopses published in this volume reflect the individual views of the authors and not necessarily that of the AAAS; its Council, Board of Directors, or Officers; or the views of the institutions with which the authors are affiliated. Presentation of ideas, products, or publications at AAAS meetings or the reporting of them in resulting news accounts does not constitute endorsement by AAAS.

---

## Acknowledgments for Proceedings Production

The Impact and Invention Proceedings was developed, organized, and edited by Steve Cunningham (NSF) and Yolanda S. George (AAAS). Proceedings production staff included Kathy Fishback, Beth Elzer, and Ann Williams (AAAS); Wendy Martin (Editorial Consultant); and Peggy Russo (Perfect Pages, Etc.).

## AAAS

AAAS is the world's largest general scientific society and publisher of the journal *Science* ([www.sciencemag.org](http://www.sciencemag.org)). AAAS was founded in 1848 and serves some 265 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world, with an estimated total readership of 1 million. The nonprofit AAAS ([www.aaas.org](http://www.aaas.org)) is open to all and fulfills its mission to "advance science and serve society" through initiatives in science policy, international programs, science education, and more. For the latest research news, log onto EurekAlert!, [www.eurekalert.org](http://www.eurekalert.org), the premier science-news website, a service of AAAS.

## National Science Foundation, Division of Undergraduate Education

The mission of the Division of Undergraduate Education (DUE) is to promote excellence in undergraduate science, technology, engineering, and mathematics (STEM) education for all students. DUE's current programs constitute a comprehensive approach to strengthening STEM education at two- and four-year colleges and universities by improving curricula, instruction, laboratories, infrastructure, assessment, diversity of students and faculty, and collaborations. These programs encompass most of the activities supported by the Division; however, additional ideas and mechanisms will be considered by DUE staff at any time.
