

# Table of Contents

## Introduction

Preface: <b>Judith Ramaley</b> , Assistant Director, NSF Directorate for Education and Human Resources Directorate . . . . .	5
Perspectives from AAAS: <b>Yolanda S. George and Shirley M. Malcolm</b> , Education and Human Resources Programs, AAAS . . . . .	7
Introduction: <b>Rosemary Haggett</b> , Director, NSF Division of Undergraduate Education . . . . .	9
Conference Overview: <b>Theodore Hodapp</b> , Program Officer, NSF Division of Undergraduate Education . . . . .	11
The Charge to Conference Participants: <b>Myles Boylan</b> , Program Director, EHR/DUE, NSF, Arlington, VA . . . . .	357

## Assessment and Education Research

<b>Connie Kubo Della-Piana</b> , Evaluation and Organizational Consultant, ORISE/ORAU EHR/DUE . . . . .	17
<b>Richardson, J.</b> <i>Concept Inventories: Tools for Uncovering STEM Students' Misconceptions</i> . . . . .	19
<b>Maki, W. S.</b> <i>Evaluating Outcomes</i> . . . . .	27
<b>Heron, P. R., L. P. S. Shaffer, and L. C. McDermott</b> <i>Research as a Guide to Improving Student Learning: An Example from Introductory Physics</i> . . . . .	33

## Successful Pedagogies

<b>Katherine J. Denniston</b> , Program Officer, EHR/DUE . . . . .	41
<b>Varma-Nelson, P., M. S. Cracolice, and D. K. Gosser</b> <i>Peer-Led Team Learning: A Student-Faculty Partnership for Transforming the Learning Environment</i> . . . . .	43
<b>Patterson, E. T.</b> <i>Just-in-Time Teaching: Technology Transforming Learning: A Status Report</i> . . . . .	49
<b>Waterman, M. A., and E. D. Stanley</b> <i>Investigative Case-Based Learning: Teaching Scientifically While Connecting Science to Society</i> . . . . .	55
<b>Beichner, R. J., and J. M. Saul</b> <i>Introduction to the SCALE-UP (Student-Centered Activities for Large Enrollment Undergraduate Programs) Project</i> . . . . .	61
<b>Russell, A. A.</b> <i>Calibrated Peer Review™: A Writing and Critical Thinking Instructional Tool</i> . . . . .	67
<b>Kaplan, D.</b> <i>Some Mathematics for Citizens: Gaining Quantitative Literacy Through Public Policy Debate</i> . . . . .	73
<b>Ellis, G. W., and B. B. Andam</b> <i>Designing the Engineering Classroom for Women</i> . . . . .	79
<b>Ulseth, R.</b> <i>From Nothing to Something</i> . . . . .	85

## Innovative Laboratory Design

<b>Roger K. Seals</b> , Program Officer, EHR/DUE . . . . .	91
<b>Johnson, M. E.</b> <i>Research Instrumentation Used in Education: Liquid Chromatography–Mass Spectrometry Experiences in Upper-Class Laboratory Settings</i> . . . . .	93
<b>Pratap, P., A. Hunter, and A. West</b> <i>Remote Instrumentation</i> . . . . .	99
<b>Boothby, J. T., and R. Kibler</b> <i>Flow Cytometry for Undergraduate Students</i> . . . . .	105
<b>Galvez, E. J.</b> <i>Undergraduate Laboratories Using Correlated Photons: Experiments on the Fundamentals of Quantum Mechanics</i> . . . . .	113
<b>Slack, H. L., and M. G. Wheatly</b> <i>Creating Laboratory Access for Science Students (CLASS): Student and Faculty Perspectives</i> . . . . .	119

## Visualization in Science Education

<b>Steve Cunningham</b> , Program Officer, EHR/DUE . . . . .	127
<b>LeGates, R.</b> <i>Using Spatial Data Visualization to Motivate Undergraduate Social Science Students</i> . . . . .	129
<b>Hall, M., and C. S. Walker</b> <i>Lessons Learned While Teaching Earth Science With GIS</i> . . . . .	135
<b>Reynolds, S. J., M. D. Piburn, J. K. Johnson, D. E. Leedy, J. A. Coyan, and M. M. Busch</b> <i>The Hidden Earth Curriculum Project: Spatial Visualization in Undergraduate Geoscience Courses</i> . . . . .	141
<b>Blanchard, P.</b> <i>Easy Animations</i> . . . . .	147
<b>Wattenberg, F.</b> <i>An Ambitious Proposal for a Common Scientific Cultural Heritage Based on Hands-On and Digital Modeling and Simulation</i> . . . . .	151
<b>Frankel, F.</b> <i>Translating Science into Pictures: A Powerful Learning Tool</i> . . . . .	155

## Web-Enabled Learning Environments

<b>Lee L. Zia</b> , Program Officer, EHR/DUE . . . . .	161
<b>Porter, S.</b> <i>Scientific Data Sets: An Important Tool for Student Learning</i> . . . . .	163
<b>Ziemer, W. K.</b> <i>WeBWork: An Open-Source Online Homework System</i> . . . . .	169
<b>Bell, J.</b> <i>Virtual Laboratories as a Tool for Teaching the Scientific Method</i> . . . . .	173
<b>Yaron, D., J. Cuadros, M. Karabinos, G. Leinhardt and K. L. Evans</b> <i>Virtual Laboratories and Scenes to Support Chemistry Instruction: Lessons Learned</i> . . . . .	177

# Table of Contents

## The Power of Interdisciplinary/ Multidisciplinary Courses and Curricula

Roger K. Seals, Program Officer, EHR/DUE	185
Moore, J., and S. Fitchett <i>Connecting Science to the Community at Florida Atlantic University</i>	187
Frantz, M. <i>What I Wish I Had Known in Art School: Foundation of a Course in Mathematics and Art</i>	193
Oakes, W. C., and L. H. Jamieson <i>Engineering Projects in Community Service: The National Engineering Projects in Community Service (EPICS) Program</i>	199
Dombach, M., M. Knight, and C. Rogers <i>Teaching Seniors Through Developing Multidisciplinary Academies</i>	205
Goldey, E. <i>Disciplinary Integration: The Sciences and Humanities in Learning Communities</i>	209
Bakewell, L. <i>Achieving Interdisciplinary Impact: Clearing the Hurdles to Mesolore's Cross-Campus Adoption</i>	217

## Creative Approaches to Faculty Development

Katherine J. Denniston, Program Officer, EHR/DUE	223
Haynes, J. M., M. M. Hluchy, and M. R. Connolly <i>Disseminating Successful Undergraduate Science Curriculum Adaptation and Implementation Strategies and CCLI Grant-Writing Techniques: Regional Workshops Led by Successful Innovators and Experienced Investigators, Evaluating Faculty Change Processes and Assessing Student Understanding of STEM Concepts</i>	227
Macdonald, R. H., C. A. Manduca, D. W. Mogk, and B. J. Tewksbury <i>On the Cutting Edge: Improving Learning by Enhancing Teaching in the Geosciences</i>	233
Atman, C. J., J. Turns, R. Adams, R. Stevens, L. Fleming, L. Leifer, S. Sheppard, K. A. Smith, and R. Streveler <i>The Center for Advancement of Engineering Education: A Description at Year 2</i>	241
Laws, P. W. <i>Promoting the Diffusion of Undergraduate Science Curriculum Reform: The Activity-Based Physics Suite as an Example</i>	247
Andersen, J., and D. I. Marinez <i>Making Proposal Writing an Affirming Adventure for Faculty: Inspiring Innovation</i>	253

## Preparing Undergraduates for Research and the Workforce

Katherine J. Denniston, Program Officer, EHR/DUE	261
Brakke, D. F. <i>Preparing Students for Research: Challenges and Some Results in Goal-Setting, Curricular Design, Assessment, and Program Coordination</i>	263
Mateja, J., and C. Otto <i>Undergraduate Research: Approaches to Success</i>	269
Barton, H. A. <i>Who's Washing the Dishes? Undergraduate Research Education</i>	273
Phillips, A. T. <i>Computer Security in Undergraduate Computing Curricula: The Challenge of Educating the Next Generation of Information Security Specialists</i>	279

## Appendix: The Conference

Appendix:	
Agenda	285
Speakers	289
Topical Session Series (titles and abstracts)	293
Posters	305

## Acknowledgments

Learning from the CCLI <i>Invention and Impact</i> Listservs: David J. McArthur, Program Officer, EHR/DUE	353
Theodore Hodapp, Chair, <i>Intervention and Impact</i> Conference Planning Committee	361

## Indices
