---

- Pretests and posttests
  - in evaluation/research designs, 30–31
  - in introductory physics courses, 34, 35, 36

Principles of Design, Engineering, and Technology for Education Majors (poster), 342

Probability/Statistics Object Library (poster), 345

Problem-Based Learning in an Integrated Geosciences Course for Future K–8 Teachers (poster), 317

Problem-Based Learning (PBL), 55, 56, 238

Problem-solving, group, 62, 63

Process-Oriented Guided-Inquiry Learning, 180

Project-Based Labs in Physical Chemistry: Physical Characterization of Sulfonamide Polymorphs (poster), 327

Project CLEA's Virtual Educational Observatory: The Universe on a Desktop (poster), 348–349

Project Kaleidoscope (PKAL), 233

Proposals, grant, writing, 225, 253–257

PsychExperiments: An Interactive Multimedia Internet-Based Laboratory for Teaching Research Methods and Statistics in Social Sciences (poster), 353

Public policy debate, quantitative literacy through, 73–77

Publishing Your Own Multimedia Map Using Dynamic Digital Map Template (poster), 349

Purdue University, National Engineering Projects in Community Service (EPICS) program at, 185, 199–203

## Q

---

Quantitative literacy, 73–77

Quantum mechanics, correlated photons and, 91, 113–117

Quantum teleportation, 115

Questions, how to ask students questions, 24

QuickTime® movie, making a, 147–148, 149

QuickTime Virtual Reality (QTVR) movies, 141–144

## R

---

Random assignments, in evaluation/research designs, 30

ReactorLab.net Laboratory Simulations (poster), 327–328

Real Data Promotes Students' Understanding of Developmental Psychology (poster), 342

RealTime Physics (RTP) lab modules, 248

*RealTime Physics* (Sokoloff et al.), 247, 249, 250

Reciprocal teaching, PLTL and, 46

Reflective journals, 45

Reflective narratives, 81–82

Reliability, concept inventory, 23

Remote instrumentation, 91, 99

- assessment, 103–104
- barriers to wide use of, 102–103
- examples of remote instruments, 100–101
- long-term sustainability of remote technology, 103
- for STEM education, 101–102
- what is a remote instrument?, 99–100

Remote Instrumentation (topical session), 295

Rensselaer Polytechnic Institute Mathematics Throughout the Curriculum (MTC) project at, 193

- Studio Physics curricula at, 61

Research-Based Curriculum Development in Thermodynamics (poster), 342–343

Research-Inspired Writing Skills for Upper Division Chemistry Majors (poster), 343

Research Instrumentation Used in Education (topical session), 303

Research, preparing undergraduates for, 261–281

Rethinking the Mathematical Statistics Course (poster), 343

Robotics Academy, Tufts University, 185, 205–206

Roots and Branches: Promoting the Diffusion of Curricular Reform Ideas Throughout Undergraduate Science Education (topical session), 304

## S
