AAAS Statement on Bipartisan Agreement to Raise U.S. Budget Caps

“We applaud the recent bipartisan agreement announced by congressional leaders and the White House to raise discretionary funding caps for fiscal years 2020 and 2021. This action is needed to allow policymakers the flexibility to authorize critical investments in our nation’s scientific research, which enables economic development and prosperity. We urge Congress to continue to work in a bipartisan fashion and finalize fiscal year 2020 appropriations that reflect support for science and innovation in the United States.”

— Alan I. Leshner, interim chief executive officer, American Association for the Advancement of Science (AAAS)

###

The American Association for the Advancement of Science (AAAS) is the world’s largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
