What You Told Us

What We’re Doing About It

12,000 members who responded to one of our surveys in 2019 and to those who responded in years past: We have heard you and we are taking this opportunity to share the ways AAAS is responding to your feedback.

Our Members...

Love Science
81% of members want to subscribe to Science.

Care About Advocacy
70% of members want to support formal advocacy for science/STEM.

Value Diversity
76% of members think it’s important that AAAS promote women and ethnic diversity in science/scientific leadership.

Give Support
74% of members want to show public support for science/STEM in our society.

Learn More
78% of members want to learn more about scientific facts behind current issues in the news.

Our Course of Action...

Each week, more than 100,000 Members receive Science, the preeminent, multidisciplinary journal published by AAAS.

How We Respond Project highlights the many ways communities in the United States are responding to climate change.

Science & Technology Policy Fellowships Program provides opportunities for scientists and engineers to contribute to federal policymaking.

Engaging Scientists helps scientists become more effective communicators while engaging with religious communities.

AAAS Policy Alert is a weekly newsletter that provides an inside look at policy affecting science and technology.

Value Diversity

STEM Equity Achievement (SEA) Change aims to effect sustainable change in diversity, equity, and inclusion at institutions of higher education.

Converging Researchers National Conference helps undergraduates and graduate students who are underrepresented minorities and persons with disabilities prepare for science careers.

Entry Point! is a national effort to discover and develop talent among undergraduates and graduate students with disabilities.
