AAAS Statement on U.S. ICE Guidelines for International Students Related to Visa Status

“The latest action by the U.S. Immigration and Customs Enforcement (ICE) to limit the participation of international students at colleges and universities in the United States is cruel to international students and damaging to America’s scientific leadership. International graduate students make significant contributions to science and technology that directly benefit us all — developing medical treatments, tracking the spread of COVID-19, improving food safety, and much more. For many decades, the U.S. had been a welcoming place for international students and scientists. This directive will harm U.S. academia and communities across our nation. We urge the administration to reconsider and rescind this guidance.”

— Sudip Parikh, chief executive officer, American Association for the Advancement of Science (AAAS)

###

The American Association for the Advancement of Science (AAAS) is the world’s largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
