AAAS Statement on Science in the Biden Administration

“We are encouraged by President Biden's emphasis on truth, unity, and service during his inaugural address as the 46th president of the United States. Responding to the COVID-19 pandemic, addressing systemic racism, protecting national security, and advancing economic interests require the use of science and technology to inform evidence-based and equitable policy options. The scientific community welcomes opportunities to assist the Biden administration and members of Congress as they work to address the multitude of overlapping challenges facing our country. We stand ready and willing to help write the next great chapter in the American story.”

-- Sudip Parikh, chief executive officer, American Association for the Advancement of Science (AAAS)

###

The American Association for the Advancement of Science (AAAS) is the world's largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
