AAAS Statement on FY 2022 Budget

To improve the health and economic well-being of all Americans, our Nation must invest in research on agriculture, climate change, clean energy, industries of the future, and biomedical research and preparedness. We must develop the next generation of science and technology leaders that reflect the extraordinary diversity of the United States and excel in the many science and technology disciplines required to enable the research.

The American Jobs Plan released last week is a first step to achieving that vision, while the President’s FY 2022 budget outline sets in motion the path for taking this vision to reality. We are pleased to see that the President’s budget focuses on national priorities such as public health research and preparedness, fundamental research to drive innovation, and steps to address diversity, equity and inclusion in science and engineering. We look forward to seeing the proposals in more detail. The next step is for Congress to provide the necessary R&D funds through the appropriations process. We have heard bipartisan Congressional support for science and technology. Those inspired words must now turn to action.

The AAAS looks forward to working with the Administration and Congress to advance the conversation on how to make the investments we need.

— Sudip Parikh, chief executive officer, American Association for the Advancement of Science (AAAS)

###

The American Association for the Advancement of Science (AAAS) is the world’s largest general scientific society and publisher of the journal Science, as well as Science Translational Medicine; Science Signaling; a digital, open-access journal, Science Advances; Science Immunology; and Science Robotics. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. Science has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
