AAAS Statement on FY 2018 Omnibus Funding Bill

“The scientific community is over the moon with the bipartisan omnibus bill in Congress that significantly increases funding for research and development. We applaud congressional leaders – on both sides of the aisle – for recognizing that funding science and technology continues to be a sound investment that benefits our nation and leads to economic growth. We encourage Members to work collectively and quickly to pass this FY 2018 omnibus bill that invests in science before the current continuing resolution expires at midnight on March 23.”

– Rush Holt, chief executive officer, American Association for the Advancement of Science (AAAS)

###

The American Association for the Advancement of Science (AAAS) is the world’s largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
