

New AAAS book on learning...

Learning: The Science Inside

is a new title from the acclaimed "Science Inside" AAAS book series. This easy to understand and engaging text provides an introduction to how people learn, from infancy to old age. Drawing upon what we have learned from exciting new research on learning and the brain, the book places the study of learning in an everyday context that makes it appropriate for a wide range of audiences, especially informal and formal educators and parents.
