THE 2009 BUDGET

- In February, President Bush proposed a $3.1 trillion budget for FY 2009.
- To help control the deficit, the President proposes to keep domestic appropriations flat, and leaves most 2009 war funding out of the budget.
- The President’s budget proposes steep cuts in many domestic programs and several program eliminations.
Composition of the Proposed FY 2009 Budget
Total Outlays = $3.1 trillion

Net interest
Defense discretionary
Nondefense discretionary
[Defense R&D]
[Nondefense R&D]
Social Security
Medicare
Medicaid
Other mandatory

Note: Projected Unified deficit is $407 billion. Figures exclude most Iraq and Afghanistan military costs. Source: AAAS, based on Budget of the United States Government FY 2009. FEB. '08 © 2008 AAAS
Trends in Discretionary Spending, FY 1976-2013
in billions of constant FY 2008 dollars

FY 2008 data are estimates. FY 2009-2013 data are budget projections. FY 2009-
2013 figures exclude Iraq and Afghanistan military costs.

THE 2009 BUDGET FOR R&D

- The ACI continues for a third year, with large increases for NSF, DOE Science, and the NIST labs to catch up to a 10-year doubling track.
- Again, there would be large increases for DOD weapons and NASA spacecraft development, but also increases for most R&D programs.
- The NIH budget would be flat, agricultural and environmental R&D agencies would decline.
Total R&D by Agency: FY 2009 Proposed
Budget Authority in billions of dollars

- DOD, $80.7
- HHS (NIH), $30.0
- NASA, $12.8
- DOE, $10.5
- All Other, $5.2
- NSF, $5.2
- USDA, $2.0
- DHS, $1.0

Total R&D = $147.4 billion (revised)

FY 2009 R&D Request
Percent Change from FY 2008

DOE Science +21%
NSF +16%
DOT
DOD weapons
NASA
NIST
DHS
DOE defense
DOE energy
NIH
VA
NOAA
EPA
USGS
DOD "S&T"
USDA

Source: AAAS, based on OMB R&D data and agency estimates for FY 2009.
DOD "S&T" = DOD R&D in "6.1" through "6.3" categories plus medical research.
DOD weapons = DOD R&D in "6.4" and higher categories.

THE FY 2009 BUDGET AND HISTORICAL TRENDS: STILL FALLING

- The 2009 proposed increases do not change the overall trends of declining federal support for research.
- Federal research in support of many national missions is in decline, including health. Funding for other areas such as homeland security and climate change science appear to be increasing again.
- Federal research investments would fall in real terms for the fifth year in a row in the 2009 budget, and are shrinking as a share of the U.S. economy.
Life sciences - split into NIH support for biomedical research and all other agencies’ support for life sciences.

WHAT’S NEXT?

- This week, Congress considers a $180+ billion supplemental bill primarily for war costs through the end of the year. There could be science funding in it (DOE Science, NIH, NSF, and NIST).

- Congress wants to finalize the FY 2009 budget resolution, which could boost domestic appropriations by up to $24 billion over the President’s request. But the President has threatened to veto any appropriations that exceed his request.

- If Congress is forced to stay with the President’s total, then ACI and other increases will be trimmed to shore up funding for other domestic programs, as in 2008.

- Many of these proposed R&D increases are authorized in the America COMPETES Act and other legislation, but the problem is in finding the resources.

- The Appropriations Committees will try to write and pass 12 2009 appropriations bills. But Congress is already considering delaying appropriations until the next President is in office.
