WELCOME TO WASHINGTON!

It’s budget time on Capitol Hill. Between early February (President’s proposed budget) and October 1 (start of fiscal 2009) Congress works on the federal budget.

- This week, Congress is working on:
  - A $100+ billion 2008 supplemental for war costs.
  - A 2009 budget resolution (congressional big-picture budget plan).
  - Learning about the 2009 budget’s details, and getting public input (from YOU) to inform appropriations (detailed spending decisions) later this year.
  - Also, a farm bill, and housing/mortgage stimulus.
Composition of the Proposed FY 2009 Budget
Total Outlays = $3.1 trillion

Net interest
Defense discretionary
[Defense R&D]
Nondefense discretionary
[Nondefense R&D]
Social Security
Medicare
Medicaid
Other mandatory

Note: Projected Unified deficit is $407 billion.
Figures exclude most Iraq and Afghanistan military costs.

INNOVATION: MAKING PHYSICAL SCIENCES A PRIORITY

- President Bush announced the American Competitiveness (ACI) in his 2006 State of the Union address.
- The ACI is one of many responses to recent reports calling for a major government effort to address the innovation challenge. There are several congressional responses, culminating in the America COMPETES Act of August 2007.
- For R&D investments, the theme is boosting federal support for basic research in the physical sciences (broadly defined).
- The plan: Doubling the budgets of NSF, DOE Office of Science, and the NIST laboratories over 7 to 10 years.
- Federal R&D supports numerous federal missions such as defense, health, environment, and energy, in addition to boosting U.S. innovative capacity.
THE 2009 BUDGET

- President Bush proposes to reduce budget deficits by cutting domestic appropriations, and keeping most war costs out of the 2009 budget.
- R&D: The American Competitiveness Initiative (ACI) continues for a third year, with large increases for NSF, DOE Science, and the NIST labs to catch up to a 10-year doubling track.
- There would be large increases for DOD weapons and NASA spacecraft development, but also increases for most R&D programs.
- The NIH budget would be flat, agricultural and environmental R&D agencies would decline.
Total R&D by Agency: FY 2009 Proposed
Budget Authority in billions of dollars

- DOD, $80.7
- HHS (NIH), $30.0
- NASA, $12.8
- DOE, $10.5
- All Other, $5.2
- NSF, $5.2
- USDA, $2.0
- DHS, $1.0

Total R&D = $147.4 billion (revised)

How the Budget Becomes Law
FY 2009 Proposal = $3.1 Trillion

Net interest - automatic

Discretionary Spending -
12 appropriations bills,
plus war supplemental bill(s)
from Appropriations
Committees

Entitlements -
Reconciliation bill,
other bills from
various committees
(such as Medicare drug
bill) (optional)

Revenues -
Reconciliation bill,
other bills from various
committees (such as the
energy bill) (optional)

WHAT ELSE IS HAPPENING

● Money is important, but so is policy.

● In response to a growing wave of concern over the state of U.S. innovation, in August 2007 Congress and the President enacted the America COMPETES Act to authorize many R&D, science and math education, and science and engineering workforce programs.

● Authorizing (policy) committees such as the House S&T Committee are considering follow-up legislation to encourage a strong innovation climate in the U.S.

● Science is an important input in many other policy areas, such as energy and climate change.

WHAT’S NEXT?

- Congress is considering the 2009 budget resolution, which could boost domestic appropriations by $20-$25 billion over the President’s request. But the President has threatened vetoes.
- There could be R&D money in the 2008 war supplemental.
- If Congress is forced to stay with the President’s total, then ACI and other increases will be trimmed to shore up funding for other domestic programs, as in 2008.
- Many of these proposed R&D increases are authorized in the America COMPETES Act and other legislation, but the problem is in finding the resources.
- The Appropriations Committees will try to write and pass 12 2009 appropriations bills by Oct. 1. But Congress could delay appropriations until the next President is in office.
