THE 2009 BUDGET

- The President has proposed a \$3.1 trillion budget for FY 2009.
- The budget deficit could approach a record \$500 billion this year and next year.
- To help control the deficit, the President proposes to keep domestic appropriations flat, and leaves war funding out of the budget beyond January 2009.

Composition of the Proposed FY 2009 Budget

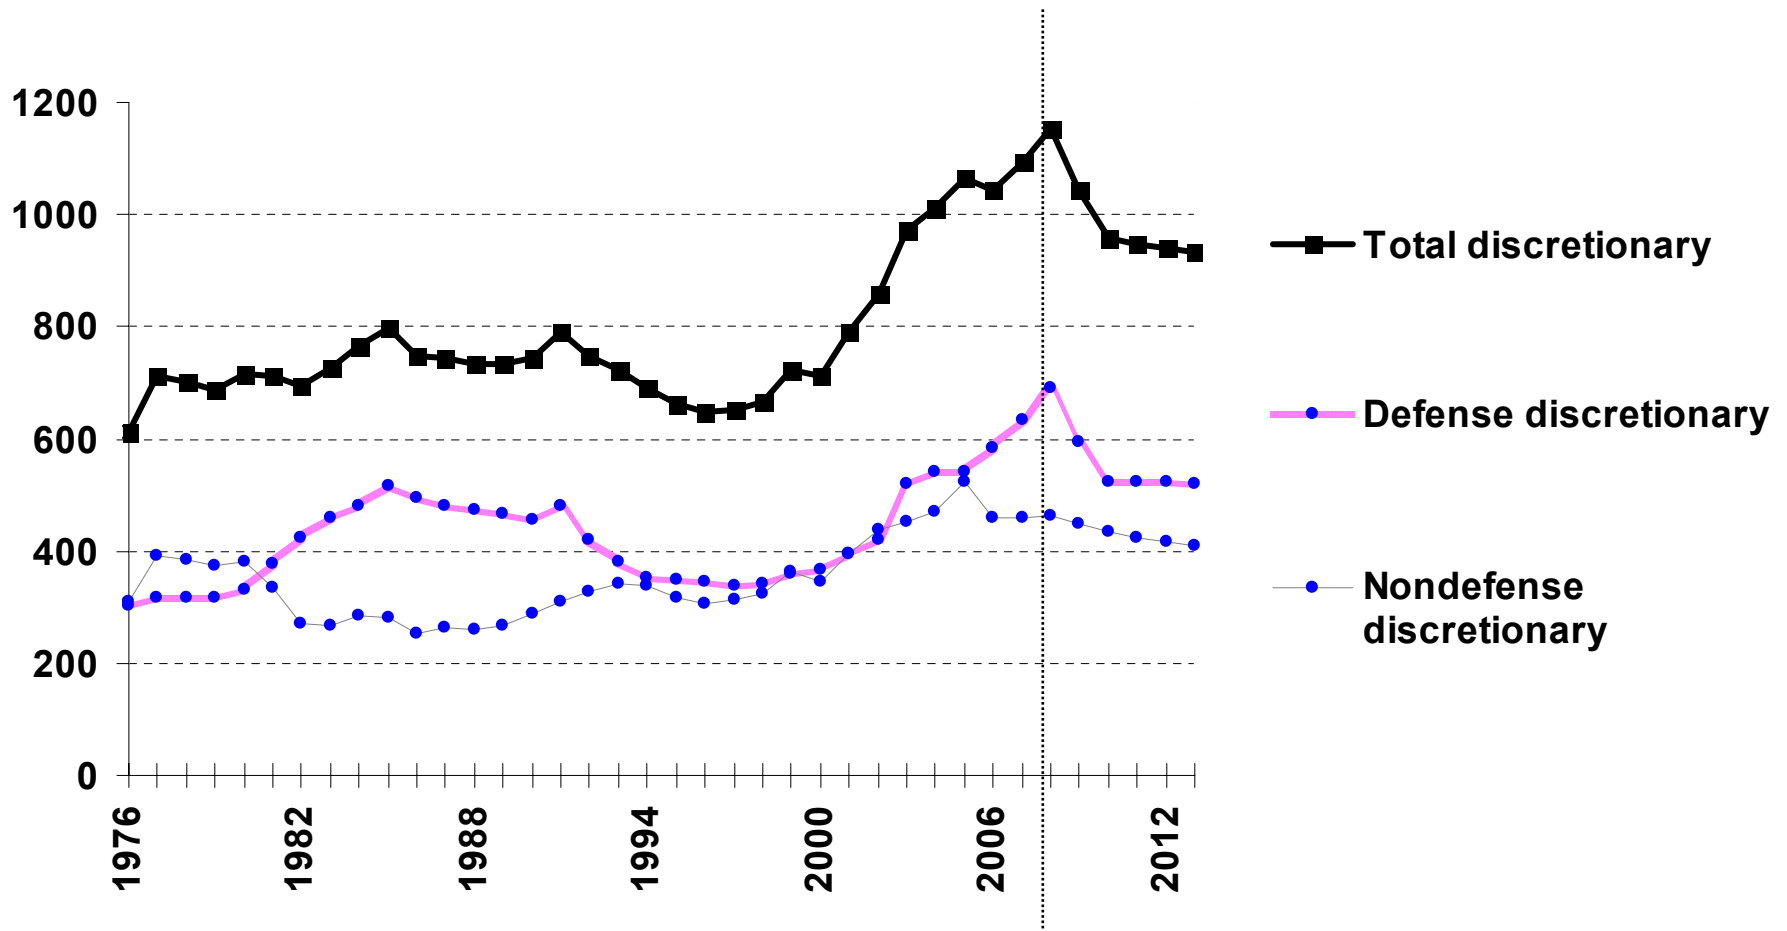

Total Outlays = \$3.1 trillion

Note: Projected Unified deficit is \$407 billion.
Figures exclude most Iraq and Afghanistan military costs.

THE 2009 BUDGET FOR R&D

- The American Competitiveness Initiative (ACI) continues for a third year, with large increases for NSF, DOE Science, and the NIST labs to catch up to a 10-year doubling track.
- Again, large increases for DOD weapons and NASA spacecraft development, but also increases for most R&D programs.
- The NIH budget would be flat, agricultural and environmental R&D agencies would decline.
- In real terms, federal basic and applied research funding would continue to decline after peaking in 2004.

WHAT'S NEXT?

- Congress considers a \$102+ billion 2008 supplemental soon.
- By April, Congress should pass a FY 2009 budget resolution with spending targets. Will there be more money for domestic appropriations? Will this additional money hold up in final 2009 appropriations? (NO in FY 2008.)
- If Congress doesn't have more money, Congress will trim ACI and other R&D increases to restore funding to health, training, education, law enforcement, and grants programs the President would eliminate or cut.
- The Appropriations Committees will try to write and pass 12 2009 appropriations bills, but Congress may delay some or all of them until the next President takes office.
