THE 2009 BUDGET

• The President has proposed a $3.1 trillion budget for FY 2009.

• The budget deficit could approach a record $500 billion this year and next year.

• To help control the deficit, the President proposes to keep domestic appropriations flat, and leaves war funding out of the budget beyond January 2009.
Note: Projected Unified deficit is $407 billion. Figures exclude most Iraq and Afghanistan military costs. Source: AAAS, based on Budget of the United States Government FY 2009. FEB. '08 © 2008 AAAS

The American Competitiveness Initiative (ACI) continues for a third year, with large increases for NSF, DOE Science, and the NIST labs to catch up to a 10-year doubling track.

Again, large increases for DOD weapons and NASA spacecraft development, but also increases for most R&D programs.

The NIH budget would be flat, agricultural and environmental R&D agencies would decline.

In real terms, federal basic and applied research funding would continue to decline after peaking in 2004.

WHAT’S NEXT?

- Congress considers a $102+ billion 2008 supplemental soon.
- By April, Congress should pass a FY 2009 budget resolution with spending targets. Will there be more money for domestic appropriations? Will this additional money hold up in final 2009 appropriations? (NO in FY 2008.)
- If Congress doesn’t have more money, Congress will trim ACI and other R&D increases to restore funding to health, training, education, law enforcement, and grants programs the President would eliminate or cut.
- The Appropriations Committees will try to write and pass 12 2009 appropriations bills, but Congress may delay some or all of them until the next President takes office.
