The President has proposed a $3.1 trillion budget for FY 2009.

To help control the deficit, the President proposes to keep domestic appropriations flat, and leaves most 2009 war funding out of the budget. Domestic spending has been flat in real terms since 2004.

The President’s budget proposes steep cuts in many domestic programs and several program eliminations.
Composition of the Proposed FY 2009 Budget
Total Outlays = $3.1 trillion

Note: Projected Unified deficit is $407 billion.
Figures exclude most Iraq and Afghanistan military costs.

INNOVATION: MAKING PHYSICAL SCIENCES A PRIORITY

- President Bush announced the American Competitiveness (ACI) in his 2006 State of the Union address.
- The ACI is one of many responses to recent reports calling for a major government effort to address the innovation challenge. There are several congressional responses, culminating in the America COMPETES Act of August 2007.
- For R&D investments, the theme is boosting federal support for basic research in the physical sciences (broadly defined).
- The plan: Doubling the budgets of NSF, DOE Office of Science, and the NIST laboratories over 7 to 10 years.
- Federal R&D supports numerous federal missions such as defense, health, environment, and energy, in addition to boosting U.S. innovative capacity.
THE 2009 BUDGET FOR R&D

- The ACI continues for a third year, with large increases for NSF, DOE Science, and the NIST labs to catch up to a 10-year doubling track.
- Again, there would be large increases for DOD weapons and NASA spacecraft development, but also increases for most R&D programs.
- The NIH budget would be flat, agricultural and environmental R&D agencies would decline.
Total R&D by Agency: FY 2009 Proposed
Budget Authority in billions of dollars

- DOD, $80.7
- HHS (NIH), $30.0
- NASA, $12.8
- DOE, $10.5
- All Other, $5.2
- NSF, $5.2
- USDA, $2.0
- DHS, $1.0

Total R&D = $147.4 billion (revised)

FEDERAL R&D IN CONTEXT: INDUSTRY AND THE WORLD

- 2/3 of all U.S. R&D is funded by industry, but industry focuses heavily on development; the majority of U.S. research is funded by the federal government.
- The U.S. compares favorably with other nations in R&D spending, but many Asian nations are dramatically increasing their R&D.

WHAT’S NEXT?

- Congress is considering the FY 2009 budget resolution, which could boost domestic appropriations by up to $24 billion over the President’s request. But the President has threatened to veto any appropriations that exceed his request.

- If Congress is forced to stay with the President’s total, then ACI and other increases will be trimmed to shore up funding for other domestic programs, as in 2008.

- Many of these proposed R&D increases are authorized in the America COMPETES Act and other legislation, but the problem is in finding the resources.

- The Appropriations Committees will try to write and pass 12 2009 appropriations bills. But Congress is already considering delaying appropriations until the next President is in office.
