LATEST NEWS

Science and Religious Communities: Investigating Perceptions to Build Understanding | Pasadena, California

With foundational work from two focus groups and a nationwide survey of nearly 10,000 people to inform it, DoSER's Perceptions Project took to the road in May.

Register today for Perceptions: Science and Religious Communities, a national conference.

SCIENCE FOR SEMINARIES

Photo courtesy of Wake Forest University School of Divinity.

With support from the John Templeton Foundation, AAAS DoSER has awarded grants to 10 Christian seminaries for pilot programs that bring science into the core of seminary education. Curricula with integrated science for at least two core theological courses (such as those in systematic theology, biblical studies, church history, and pastoral theology) will be developed by each school and implemented

over the next two years. This integrated approach will impact not only individual seminaries but the ministries in which graduates serve. Science-focused, campus-wide activities will compliment coursework and resources from the project will be made available to interested seminaries as the project unfolds. Read more about the project [here](#).

SUPPORTING SCIENTISTS

DoSER will host a workshop, "Discussing Science With Religious Students and Audiences" at the 2015 AAAS Annual Meeting in San Jose, California. The aim of this workshop is to equip scientists to better understand and address questions and concerns about science from religious students in their classrooms and from largely religious public audiences. Scientists

from academic and public engagement organizations will present practical examples and advice on how to present science in ways that are sensitive to audience concerns, avoiding unnecessary pitfalls while sharing science constructively.

EVENTS

Perceptions: Science and Religious Communities

March 13, 2015

Ronald Reagan Building and International

REGISTER »

DoSER's Perceptions Project will host a National Conference at the Ronald Reagan Building and International Trade Center in Washington, D.C. on March 13, 2015. The Perceptions Project investigates perceptions to build understanding between scientific and religious communities, especially evangelicals. This conference will bring together national leaders in science and religion—including DoSER director Dr. Jennifer Wiseman and National Association of Evangelicals president Rev. Dr. Leith Anderson -- to further conversation and to plan a course for future dialogue.

ANNOUNCEMENTS

Employment opportunities

DoSER is Hiring: [Senior Program Associate](#)

The American Association for the Advancement of Science seeks a Senior Program Associate to work within the AAAS Dialogue on Science, Ethics, and Religion Program. The position involves a project in partnership with select seminaries throughout the United States to integrate science into their core curricula, with a goal of promoting a positive understanding of science among religious leaders and eventually the communities they serve. This position is anticipated to extend for an initial period of one year with the potential for renewal contingent on performance.
